To Whom it may concern,

I worked with Mr. Nazir Ahmad Shah between 2002 and 2008 (April). I was his direct supervisor between 2005 and 2007.

Mr. Shah is a very professional and loyal person to his work. He committed his self to his work very honestly. In most difficult field and political conditions, he performed his work very well. In addition to this, he improved his self in terms of using different technologies to implement the Afghanistan opium poppy survey activities like remote sensing and geographical information systems. He supervised more then 300 field surveyors with a great success. He trained hundreds of surveyors every year to collect information and data for UNODC. Afghanistan opium poppy survey report is a flagship of UNODC and Mr. Shah's contribution on this survey is very high.

I highly suggest Mr. Shah for your institution.

Best regards

Hakan Demirbuken
