TO WHOM IT MAY CONCERN

Eng. Nazir Ahmad (Ahmad Shah)
Bsc. (Agr. Eng.), Post Grad. Dip. (Irrigation & Drainage)

It has been my considerable pleasure and fortune to have worked with Eng Nazir Ahmad during the past year in my capacity as Project Manager of the Afghanistan Annual Opium Poppy Survey.

Eng Nazir is employed by UNDCP as the Survey Team Leader. He assumes full responsibility for all facets of the survey implementation, including recruitment of surveyors, training, deployment and monitoring. This is a difficult task that requires considerable people skills, technical competence, and liaison with authorities at the senior level.

In all respects Eng Nazir has carried out his tasks with the highest level of professionalism, courtesy, and good humour. The outstanding success of the 2000 survey is primarily due to his dedication and hard work. It has been a pleasure to work with him and I will miss our valued collaboration.

I have no hesitation in recommending Eng Nazir for a variety of positions at senior professional level in the fields of agriculture, land management and planning, and civil engineering, or any other areas compatible with his background.

Should you require further comment please do not hesitate to contact myself by email as indicated above.

Yours Sincerely

David C Altman MEngSci
